Practical information

All participants will be muted to avoid background noise.

Please, keep your camera switched off, in order to avoid connection problems.

If you have questions, please, write them in the chat: they will be read aloud after each panel or answered in the chat itself.

If you cannot hear:

- Make sure to select the correct peripherals upon connecting: try to leave the meeting and, when you reconnect, click on 'Select audio - Use computer for audio' on the audio/video peripherals connection page.
- If you have already selected 'Use computer audio', make sure that your speaker or headset is connected properly.
- If the computer audio still does not work, connect with the Call-in option (via a physical phone).
